HE FACULTY

RBARA KLAESER
ivision, General Studies Department

by Tom Bartell

s. Barbara Klaeser was raised and edu-
Sheboygan, Wisconsin, where she gradu-
n high school in 1959. She entered col-
Marquette university, receiving her Bache-
ts degree in Speech and Spanish in 1963.
ter MU she entered Northwestern uni-
o begin on her Master of Arts degree. She
ed study on it in 1966 at Marquette, then
the University of Wisconsin-Milwaukee
er reading teacher's license. She is now
on a Master of Science Degree in coun-
UWM. Her future plans include working
ctorate at Cambridge, England.
mid all this studying, Mrs. Klaeser has
he time to teach theatrical costuming and
o at Northwestern university. She also
for three years at Fulton junior high

er hobbies include the newly organized
Club here at MSOE. She is also an avid
goer. Yet among all these studies and
es, she still finds the time to read ex-
y for pleasure.
Mrs. Klaeser's duties here at MSOE include

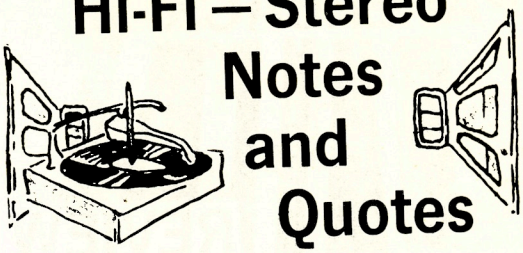
CHECKS (continued from page 1)

Checks need not be announced.

Some objections had been raised by students before the policy was clarified: specifically

Hi-Fi – Stereo Notes and Quotes



One of the most versatile components of the Modern Stereo-HiFi systems is the tape recorder. Let's take a look at how it works.

The tape recorder transcribes on magnetic tape speech or music in the form of magnetic patterns. The functional parts of a tape recorder basically include a tape transport to shuttle the tape, a tape erase head, a recording amplifier, a recording tape head, magnetic recording tape, and a playback amplifier.

When recording and playing back magnetic tape, each part performs its specific function. When recording, the tape first passes the erase head, which erases any information previously recorded on the tape. Then the desired signal applied by a mike or other source is amplified by the recording amplifier and applied to the recording tape head.

On playback the functioning of the recorder is reversed. The magnetic patterns on the tape produce electronic impulses in the playback tape head, which are amplified by the playback amplifier. Often, for reasons of economy, one head is used for the recording and playback head, and one amplifier is used for both the recording and playback amplifier.

Stereophonically yours,
John Bunkfeldt

CONSTITUTION (continued from page 1)

changes. He has consistently maintained that the SA was not out to steal "power" from anyone. He saw the changes as mere formality. His pet contention, "There is no power," was given supporting evidence when Article II section II concerning powers came back from the SLC unchanged. It reads: "These aforesaid powers of discipline and self government of the Student Association shall, however, in no manner infringe upon nor interfere with the responsibility, duty and authority of the Milwaukee School of Engineering, to maintain discipline in the school and govern the operations of the school." This section
